*For Immediate Release*

## Elephant, the Oeuf crib you can assemble in 10 minutes!

Brooklyn, NY – July 2013 – Oeuf

Combining its talent and innovative know-how with the playful creativity of the Spanish designer Carlos Tiscar, Oeuf launches Elephant, a crib that can be assembled in 10 minutes. This crib was designed to be a fun addition to a nursery and to make the busy life of modern parents easier.

Like all the cribs designed by Oeuf, the Elephant converts to a toddler bed, with a conversion kit that is sold separately. It can be adjusted to 3 different mattress positions and has fixed sides.

The crib is made in Europe from eco-MDF from sustainably managed forests in an FSC certified facility. All finishes are non-toxic and water-based, and the sustainable wood provides a healthy and safe sleeping environment. Oeuf recycles all the remaining wood and uses recycled cardboard to pack all of its products.
